

<b>Task #</b>	23 - 03	<b>Date:</b>	9 <sup>th</sup> February 2023	
<b>Meet:</b>	Millennium Park			

Lovely working at Millennium Park today. We were at the Melton Road entrance clearing the old wildflower area - removing a fair few unwanted saplings and also thinning out the trees along the fence line to try to get a bit more light in the area.

We thinned out a few spaces within the wooded area to create 3 new habitat piles for the local buglife and after removing the top layer of dead grass we added that on top.

The wildflowers have already started to come through and it was easy to spot young wild geraniums and primroses amongst the new growth. Hopefully we will be sowing seeds in a few weeks time to increase the diversity of species here for future years.

Thanks to the team today: (L-R) Andy, Nick, Brian, Karen, Andrew, Ian, Philip, Bill and Ali.

**Next Task:**

Thursday 10:00 23<sup>rd</sup> Feb

Location: [Wi Garden, Nottingham Road](#)
