# **The Dragon with Yin & Yan**

**In Chinese Folk Lore the Dragon was a benevolent creature with powers to bring rain, floods and even hurricanes to a land. Along with this ability the Dragon signified power, strength and good luck.**

**Starting in the Han Dynasty (206BC-220AD), Emperors took the symbolism of the Dragon as they hoped to bring good fortune to their lands.**

**The number 9 is considered lucky in Chinese culture, and this fact is represented in the depiction of the Chinese Dragon. Nine different animal resemblances make up the appearance of the Chinese Dragon.**

**The scales of the Dragon further display the significance of the lucky number 9. It is said that the dragon possess scales of both the Yin and Yan essence, with 81 and 36 scales respectively, both numbers being multiples of 9.**

**Yin and Yan are not in conflict with one another as is often thought in the West, rather they act constantly, achieving a delicate balance for harmony. When Yin and Yan fall out of balance, disaster follows.**

**Our dragon, although he looks fierce, he's not he's just protecting that delicate balance of Yin and Yan**
